Aloe vera (*Aloe vera Barbadensis* Miller) is a plant appreciated for its strong antibacterial and anti-inflammatory effects. The rich blend of vitamins, minerals, inorganic substances and organic compounds contained in the Aloe Vera plant, has positive effects on the human body and helps to protect one's health. Some nations even consider Aloe Vera as a natural antibiotic.

Due to its composition, it takes full advantage of the antibacterial effects of the Aloe Vera plant, helps remove possible gum inflammations and relieve their symptoms, removes tooth plaque, helps to heal minor wounds and infections in one's mouth. The Aloe Vera plant that is contained in Essens Toothpaste comes from organic plantations in Mexico.

Why is Aloe Vera Essens toothpaste without fluoride?

Sodium fluoride is known as a carcinogen. It affects the activity of the brain and nerves, and weakens the kidneys. A surplus of fluoride can cause stains on the enamel of teeth. Long-term but also small amounts exceeding the recommended daily dose can cause bone pain, stiffness, weakness, chalky white spots on teeth, brown and pitted teeth, growths on bones, rapid aging, increased cancer risk, sagging and wrinkled skin or scleroderma.

In commonly ingested food there is a sufficient amount of fluoride, it is not necessary to make an additional supply to the human body, including the source of toothpaste. According to latest research, fluoride causes osteoporosis. **Therefore toothpastes without fluoride are recommended for children and adults.**

By cleaning teeth regularly with the Aloe Vera ESSENS Toothpaste, it helps prevent inflammatory diseases, dental caries and improves the quality of dental enamel and look of teeth, even without the use of fluoride in its ingredient composition. Our toothpaste therefore ranks among the products that follow the ever increasing trend of protecting one's health from the excessive consumption of fluoride and its accumulation in the human body.

Instructions for use: thoroughly clean teeth with Aloe Vera ESSENS Toothpaste after every meal.
