H el ene Fizet

A creative perfumer with more than two decades of experience in the perfume industry, who gave all Essens Unique perfumes their soul. H el ene comes from France, the cradle of luxurious fragrances and her passion is to create sensual perfumes for prestigious international producers and companies.

ESSENS Unique are original and unique perfumes developed for original and unique personalities. They are the result of the desire of a world renowned perfumer to create a unique perfume composition using the finest and most expensive natural raw materials available in the world market today.

The essences were selected in order that the resulting aroma could receive the hallmark of quality, luxury and timelessness. To achieve the exact ratio of ingredients to be used in the final perfect fragrance, the several preceding months were full of careful, even alchemic work, followed by a long-term maturation process in stainless steel tanks, where the different components are combined to form a harmonious unit. Matured perfumes are filled into modern glass bottles, complemented by an innovative transparent sprayer, which is almost invisible in the bottle, but also enables highly efficient dispersion of particles into a very fine perfume puff.

The impression of exclusivity is highlighted by a stylish cap made of exotic wood and a luxury box.
